

I understand that BellSouth has filed a petition asking the FCC to stop regulating broadband service. I am opposed to this action. My local ISP is Sonic.Net in Santa Rosa, CA. I have used it for over 8 years. Sonic.Net (originally named Sonoma Interconnect) provides very reliable service: the connection by either modem or dsl through SBC is always available. If I telephone or email for support, a human being answers the phone or the email. Sonic.net is very conscientious in providing reliable and fast connections. Sonic.net was started by local junior college students about 10 years ago and has grown into a very responsible regional provider of internet services. I hope that the FCC will continue to regulate broadband service so that ISP's such as Sonic.net can continue to provide service at competitive rates. Thank you.
